

Australian Limestone
The natural choice.

“Limestone, the natural choice.”

With warm tones and exquisite textures limestone creates a tactile connection between the natural and the constructed environment. The reflective quality of natural limestone creates an alluring lustre which changes with each season.

 Create something beautiful.

Biscuit Limestone

Cream Limestone

Oyster Limestone

Shell Limestone

Jaffa Limestone

Subtle colour variations are an inherent property of limestone which ensures every build is unique. Warm in winter and cool in summer natural limestone is perfect for the Australian environment.

Limestone Australia sources quality limestone from rich deposits across Australia which is processed into forms suitable for the construction and landscaping industries.

We have invested extensively in machinery for the working of raw limestone to produce block, cladding and a wide range of bespoke options.

We supply our stone in a range of finishes & textures:

Honed

External face of the stone is ground flush. Pitting, if present is still evident

Rustic

External face of the stone is textured with either circular saw cut marks or pitting resulting from a quarry/bush hammer process

Saw Cut

Surface of the stone face may have saw cut marks evident that can be removed by sanding or grinding if required

Split Face

External face of the stone is split to give a 'rock face' texture.

Standard Forms

Building Block

Textures - Honed & Rustic*

500 x 245 x 100mm

500 x 330 x 100mm

Cladding & Corners

Textures - Honed & Rustic*

500 x 330 x 30/35*mm

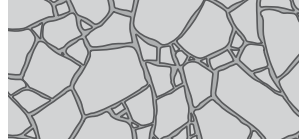

350 x 330 x 30/35*mm
with 100mm return

Random Forms

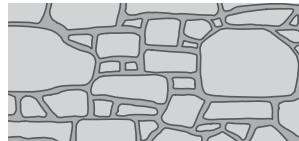

Mosaic Cladding

Texture - Saw Cut
Random sizes x 30mm

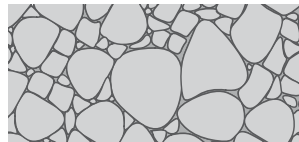

Tuscan Cladding

Textures - Saw Cut & Rustic
Random sizes x 30-60mm

Free Stone

Texture - Split Face
Random sizes 100-300mm

“

A deep rich colour with natural textures and earthy charm, adding a rustic appeal to both interior and exterior builds.

Bespoke Forms
