

Forms & Patterns

Pattern/Style	Description	Detail	WA Limestone		SA Limestone		
			Cream	Biscuit	Buff	Shell	Yorke
Stretcher, running or half bond	Laid in a coursed pattern, every second vertical joint is the same and generally occurs to the center of the adjacent block below.						
Two Part Random Bond	Stone work is combined in a pattern of full, quarter and half height blocks laid in random pattern.						
Coursed Random or mixed length Bond	Laid in a coursed pattern where the bedding joint is level, vertical joints are staggered and not repeated within the adjacent two courses.						
Stacked Bond	Stone is “stacked” on top of each other, the bedding joint and the perpendicular joint is in the same gridline.						
Mosaic	Laid with a flush surface finish, consists of random sizes of stone pieced together generally without mortar joints.						
Rubble	Stone is rubbled to the edges and laid in a random “strata” form to fit each other piece. Usually with mortar joints.						
Freestone	Applies to the quarry rubble or spalls which is shaped to fit each other piece.						
Bespoke	Specialised pieces for unique use generally shaped to form specific architectural requirements.						
Sculptural	Selected stone for sculpting.
